

CYBERSECURITY CONSULTING

Virtual CISO (vCISO)

Executive security leadership on demand, a senior CISO who owns your strategy, roadmap, and risk decisions without the cost of a full-time hire.

CyberX One's Virtual CISO service embeds an experienced security executive in your organization on a fractional basis. Over a typical two-to-three-year horizon we baseline your current posture, build a prioritized cybersecurity roadmap, and drive the initiatives that move you from reactive to resilient, reporting to your leadership or board throughout.

Objectives

- Establish a clear baseline of your current security posture through a structured maturity assessment.
- Build a two-to-three-year cybersecurity roadmap and operating plan with short- and long-term goals, owners, timelines, and budget.
- Secure leadership and board buy-in for security investment with business-aligned cases and KPIs.
- Stand up and maintain a living cybersecurity risk register, driving remediation to acceptable levels.
- Advise on the evolving threat landscape and framework-aligned protection of your critical assets.

Outcomes & benefits

- **Business alignment**, security initiatives mapped directly to your organizational strategy.
- **Risk management**, clear criteria and consistent risk reporting to senior leadership.
- **Governance**, an annual documentation cycle, a security committee, and defined roles.
- **Measurable maturity**, posture improvement tracked through meaningful KPIs.
- **Compliance**, initiatives that stay aligned to the frameworks and regulations you answer to.

Scope of service

- Lead security projects and execute against the roadmap.
- Chair or support a cybersecurity governance committee.
- Own the risk register and remediation tracking.
- Provide third-party and vendor risk oversight.
- Deliver board and executive reporting with a live KPI dashboard.
- Guide policy and framework adoption across the organization.

Our process

1 Baseline

Assess current maturity, controls, and risks to set an honest starting point.

2 Roadmap

Build the multi-year plan, goals, owners, timelines, and budget cases.

3 Execute & govern

Drive initiatives, chair governance, and keep the risk register current.

4 Report & adjust

Report KPIs to leadership and adapt the roadmap as threats evolve.

What you receive

- Security maturity baseline report
- Multi-year cybersecurity roadmap and operating plan
- Living cybersecurity risk register
- Executive / board reporting pack and KPI dashboard
- Ongoing advisory access between reporting cycles
